

SIP-T33P/T33G

Startup

After the IP phone is connected to the network and supplied with power, it automatically begins the initialization process. After startup, the phone is ready for use. You can configure the phone via a phone or web user interface.

Configure Your Phone

Configure via Web User Interface

- **Accessing the web user interface:**
 1. Press  (the OK key) to obtain the phone's IP address when the phone is idle.
 2. Open a web browser on your computer, and enter the IP address into the address bar (e.g., "http://192.168.0.10" or "192.168.0.10").
 3. Enter the user name (default: admin) and password (default: admin) in the login page and click **Login**.
- **Network Settings:** Go to **Network > Basic > IPv4 Config**.

You can configure the network settings in the following ways:

DHCP: By default, the phone attempts to contact a DHCP server in your network to obtain its valid network settings, e.g., IP address, subnet mask, gateway address and DNS address.

Static IP: If your phone cannot contact a DHCP server for any reason, you need to configure the IP address, subnet mask, gateway address, primary DNS address and secondary DNS address for the phone manually.

NOTE

The IP phone also supports IPv6, but IPv6 is disabled by default.

The wrong network settings may result in the inaccessibility of your phone and may impact the network performance.

Please contact your system administrator for more information.

- **Account Settings:** Go to **Account > Register > Account X** (X=1, 2, 3, 4).

- **Parameters of the account:**

Parameter	Description
Register Status	It shows the registration status of the current account.
Line Active	You can select Enabled/Disabled to enable/disable the account.
Label	It is shown on the LCD screen to identify the account.
Display Name	It is shown as caller ID when placing a call.
User Name	It is provided by ITSP for registration (required).
Register Name	It is an authenticated ID for authentication provided by ITSP (required).
Password	It is provided by ITSP for registration (required).
Server Host	It is provided by ITSP for registration (required).

- **Register status icons on the LCD screen:**

(Green)Registered

(Yellow) Registering

(Gray)Register Failed

NOTE

Check with your system administrator if any error appears during the registration process or if a specific configuration is required.

Configure via Phone User Interface

- **Network Settings:**

Press the **Menu** when the phone is idle, and go to **Settings > Advanced Settings** (default password: admin) > **Network > WAN Port/Wi-Fi Port/VLAN/Web Server/802.1x/VPN/LLDP/CDP/NAT** to configure the network.

- **Account Settings:**

Press the **Menu** when the phone is idle, and go to **Settings > Advanced Settings** (default password: admin) > **Accounts** to configure the account.

NOTE

Refer to **Configure via web user interface** above for more information about the account parameter.
